Module 1 | 60 minutes | Role, Task, Context, Format | Adults (18+) · ages 18–65

Name: Class: Date:

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. Role ___ A. The shape of the answer: length, bullets, table, language, tone.
b. Task ___ B. The background facts the AI cannot know unless you tell it.
c. Context ___ C. The exact job: write, reply, translate, summarise.
d. Format ___ D. Who you want the AI to act as, like a polite shop helper or an HR assistant.

2. Prompt Lab: the 4-part WhatsApp reply

A customer messages your shop on WhatsApp: “The cooler I ordered on Monday has still not come. What is happening?” The delivery van broke down; it will now come on Friday. Write a 4-part prompt (Role, Task, Context, Format) to get a good reply. Write your prompt here, then try it in ChatGPT or Claude or Gemini or Microsoft Copilot.

3. Prompt Lab: ask me questions first

Meera, a school teacher, needs a notice for parents about a parent-teacher meeting, in English and Hindi. Write a prompt that gives a role and a task, asks for both languages, sets a format, and asks the AI to ask you questions before it writes. Write your prompt here, then try it in Gemini or ChatGPT or Claude or Microsoft Copilot.

4. Match each part of a prompt to its example (a CA's assistant writing to clients)

Draw a line from each word to its match.

a. Role ..... A. Make it a WhatsApp message under 50 words.
b. Task ..... B. The return filing date is close and 12 clients have not sent bills yet.
c. Context ..... C. Draft a reminder asking clients to send their bills.
d. Format ..... D. You are an experienced assistant in a CA office.

5. Better prompt: A or B?

Better prompt: A or B? A: "Write a leave application." B: "You are a helpful writing assistant. Write a short, polite leave application to my manager for 2 days, 12–13 November, for my sister's wedding in Jaipur. Under 80 words." Circle one.

a. A. A, because short prompts are better
b. B. B, because it gives role, task, context and format
c. C. Both will give the same result
d. D. Neither; AI cannot write leave letters
