Lesson 6: Research You Can Trust

Module 2 | 60 minutes | Sources and fact-checks | Adults (18+) · ages 18–65

Name: _____ Class: _____ Date: _____

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. source / citation ___ A. Facts that were true once but have changed, like an old fee or deadline.

b. official source ___ B. A made-up fact, number or link that the AI says confidently.

c. hallucination ___ C. The organisation that makes the rule or owns the facts, like a ministry, regulator or the company itself.

d. outdated information ___ D. The web page or document a fact comes from, shown as a link or number.

2. Prompt Lab: a research prompt with sources

Write a research prompt for a real question from your work (a market or a policy question). Ask for sources, ask for recent information, ask for official websites, set a format, and tell the AI what to do if it is not sure. Write your prompt here, then try it in Perplexity or Gemini or ChatGPT or Microsoft Copilot.

3. Prompt Lab: the fact-check table

You have 4 claims in your research note. Write a prompt asking a second AI tool to fact-check them: list the claims, ask it to verify each one, ask for a source link, ask it to flag wrong or outdated claims, and ask for a table. Write your prompt here, then try it in ChatGPT or Perplexity or Gemini or Claude.

4. Can you rely on this source for a work note?

Write each item in the right group: Good source to rely on / Check elsewhere first.

a. An official government website ending in gov.in → _____
b. A dated press release from a ministry or regulator → _____
c. A company's own annual report (for facts about that company) → _____
d. A well-known newspaper article with a date and author → _____
e. A WhatsApp forward with no name or date → _____
f. A blog post from 2018 about today's rules → _____
g. An AI answer with no links → _____
h. A video from an unknown channel promising "secret rules" → _____

5. Spot the hallucination

Spot the hallucination. The AI says: "Demand for millets in Indian cities grew 300% last year [3]." You open source [3] and it is about rice exports and never mentions millets. What is going on? Circle one.

a. A. The source is wrong, so the AI must be right
b. B. The AI linked a source that does not support its claim, so treat the number as made up and remove it
c. C. It is fine because there is a link
d. D. Search for any website that says 300%

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

- ☐ I can ask an AI search tool for sources and official websites.
- ☐ I can open and check every source for the exact claim, publisher and date.
- ☐ I can spot hallucinations and old information and remove them.
- ☐ I can write a one-page note where every point has a checked source.
