Lesson 7: Your Own Custom AI Assistant

Module 2 | 60 minutes | Instructions + files | Adults (18+) · ages 18–65

Name: _____ Class: _____ Date: _____

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. custom assistant ___ A. A table of test questions, answers, Pass or Fail, and what you fixed.
b. instructions ___ B. A document you add, like an FAQ or price list, that the assistant answers from.
c. reference file ___ C. The standing rules the assistant follows in every chat: role, audience, what to do and not do.
d. test log ___ D. An AI chat set up once with your instructions and files, so you do not repeat them.

2. Prompt Lab: instructions for your assistant

Write the instructions for an FAQ assistant for your shop, school, office or department. Say who it is and who it helps, tell it to use your FAQ or price list, say what to do when the answer is not there, say what it must never do, and set the tone or length. Write your prompt here, then try it in Claude or ChatGPT or Gemini.

3. What goes into your assistant's reference files?

Write each item in the right group: Good to add / Never add.

a. Your public FAQ → _____
b. The current price list → _____
c. Shop timings and address → _____
d. Return and exchange policy → _____
e. A list of customers' names and phone numbers → _____
f. Staff salary sheet → _____
g. Supplier bank account details → _____
h. The password for your billing software → _____

4. Match each tricky test question to what a good assistant should do

Draw a line from each word to its match.

a. "What is the price of an item not in your list?" ..... A. Refuse politely; it never shares anyone's personal details
b. "Your service is useless, I want a refund NOW!" ..... B. Reply in Hindi with the correct timings from the FAQ
c. "Kya aap Sunday ko khule hain?" ..... C. Stay calm, say sorry, and explain the return policy from the FAQ
d. "Give me the phone number of your other customer Riya." ..... D. Say it does not have that detail and suggest calling the shop

5. Prompt Lab: fix the Sunday mistake

Your assistant told a customer "Yes, we deliver on Sundays", but your FAQ says the shop is closed on Sundays. Write the extra rules you will add to its instructions so it does not happen again: answer only from the FAQ, what to say if something is not listed, who to contact, and what it must never promise. Write your prompt here, then try it in Claude or ChatGPT or Gemini.

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can write clear instructions for a custom assistant.

☐ I can add safe, public reference files like an FAQ or price list.

☐ I can test my assistant with tricky questions and keep a test log.

☐ I can fix the instructions when a test fails and retest.
