Checklist

- [ ] Routine card: step, tool, prompt or template, human check
- [ ] At least two AI tools or features used
- [ ] “After” time including checks, and time saved per week
- [ ] One AI mistake or risky suggestion caught and explained
- [ ] Responsible-use checklist for your workplace, and a 3-minute demo

Milestones

1. Task chosen, mapped and timed — done on: _____
2. AI steps, human checks and templates designed — done on: _____
3. Routine run with practice data and timed — done on: _____
4. Demo rehearsed and presented — done on: _____

Plan it

Write your plan: the problem, who it is for, the AI tools you will use, and how you will check the AI’s work.

How it will be marked

Criterion	1 · Beginning	2 · Developing	3 · Secure	4 · Excellent
Task map and design	No clear steps	Steps listed but AI and human roles unclear	Clear steps with AI steps and human checks marked	Clear, efficient design with privacy steps and a reusable routine card
Use of AI tools	One vague prompt	One tool used with a basic prompt	Two or more tools with saved 4-part prompts or templates	Tools well chosen for each step, prompts tested and improved
Measurement and checking	No times given	Times given without checking time	Honest before and after times including checks, with one caught mistake	Honest times, caught mistake explained, and quality changes noted
Responsible use and demo	No checklist; private data used	Basic checklist; demo unclear or over time	Clear checklist and a 3-minute demo that covers the task, times and one mistake	Workplace-ready checklist and a confident demo a manager could act on
