Lesson 8: Capstone: Automate One Weekly Task

Module 2 | 60 minutes | Your AI routine | Adults (18+) · ages 18–65

Name: Class: Date:

Plan your project and practise the key ideas.

1. Key words

Match each word to what it means. Write the letter.

a. workflow / routine ___ A. A saved prompt, document or sheet you reuse every week.
b. automate ___ B. A step where a person reviews, decides or approves before anything moves on.
c. human check ___ C. Make a task faster and repeatable with tools; in this course, AI drafts and you check.
d. template ___ D. The steps you follow to finish a task, in order.

2. Prompt Lab: design your AI routine

Write a short design for your weekly AI routine. List the steps in order, say which steps the AI will do (and which tool or prompt), where you will check, how you will keep private data out, and the time before and after. Write your prompt here, then try it in ChatGPT or Claude or Gemini or Microsoft Copilot.

3. AI step or human step?

Write each item in the right group: AI can draft it / A person must decide or check it.

a. First draft of the weekly sales summary from a cleaned table → _____
b. Deciding which customer gets extra credit time → _____
c. Turning meeting notes into an action-item table → _____
d. Final check of every number before it goes to the boss → _____
e. First draft of the parents' newsletter → _____
f. Approving a payment → _____
g. A Hindi version of a notice (draft) → _____
h. Checking the Hindi says the right thing → _____

4. The capstone path

Put the capstone steps in order. Number them 1–6.

a. ___ Run the new routine and time it (after)
b. ___ Make templates and a routine card
c. ___ Mark AI steps and human checks
d. ___ Map every step and time it (before)
e. ___ Pick one weekly task
f. ___ Present a 3-minute demo with your checklist

5. Honest time saved

Before: 90 minutes. After: 25 minutes of AI-assisted work plus 10 minutes of checking. How much time do you honestly save each week? Circle one.

a. A. 65 minutes
b. B. 55 minutes
c. C. 90 minutes
d. D. 10 minutes

6. My plan

Plan your project: Choose one task you do every week at work, redesign it as a repeatable AI routine with human checks and templates, measure the time saved honestly, and present a 3-minute demo with a responsible-use checklist. Sketch it and list what each part will do.

7. Checklist

Tick each one when your project does it.

a. ☐ Task map with steps and the “before” time
b. ☐ Routine card: step, tool, prompt or template, human check
c. ☐ At least two AI tools or features used
d. ☐ “After” time including checks, and time saved per week
e. ☐ One AI mistake or risky suggestion caught and explained
f. ☐ Responsible-use checklist for your workplace, and a 3-minute demo

8. Two stars and a wish

Ask a friend to test your project. Write two things they liked and one idea to improve it.

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can map a weekly task and time each step.
☐ I can design a routine with AI steps and human checks.
☐ I can make templates and a routine card that I reuse.
☐ I can measure time saved honestly and present a demo with a responsible-use checklist.
