LESSON PLAN · FINANCIAL LITERACY (GR 3–5) BEGINNER: MONEY SMART · LEVEL 1

Lesson 3: Making a Budget

Module 1 | 45 minutes | Budget and 3 jars | Grades 3–6 · ages 8–11

Objective: Make a simple weekly budget with income, spending and saving, and split pocket money into Spend, Save and Share jars.

Success criteria

- I can explain income, spending and saving.
- I can split money into Spend, Save and Share jars.
- I can make a weekly budget that adds up.
- I can find small spends that add up.

Key vocabulary

- **income**: Money that comes in, like pocket money or a gift.
- **spending**: Money that goes out when you buy something.
- **saving**: Money you keep for later.
- **sharing**: Money you give to help others or a good cause.
- **budget**: A plan for your money before you spend it.

You will need

- Projector or screen share with Kitabash (lesson video, activities)
- Devices: 1 per learner (laptop, tablet or phone); a microphone helps for speaking tasks
- Printed worksheet, paper and pencil
- Project files: l03_weekly_budget_planner.md, l03_teacher_script.md

Timed lesson plan (45 min)

Time	Stage	What happens
5 min	**Warm-up game**	“Where did the money go?” story game with ₹100 of play money in pairs.
4 min	**Watch + poll**	Play the video. Poll: “Which jar would you fill first?” (fingers: 1 Spend, 2 Save, 3 Share).
5 min	**Live demo**	Wrong way then right way with three jars; write the budget equation on screen and check it adds up.
7 min	**Build along**	Make your three jars, pay yourself first with ₹200 play money, write the plan, check the total.
7 min	**Budget sim**	My weekly pocket money (₹200). Thumbs check: who kept at least ₹40? Volunteers share their wants.
6 min	**Team relay**	Quick competition: teams take turns on the Spend/Save/Share sort, then race the budget maths.

4 min	**Pairs: order game**	Breakout pairs: “Make a budget step by step”, then the Diwali money probe.
4 min	**Project**	Start “My weekly pocket-money budget” in the planner; finish at home.
3 min	**Show-and-tell + exit**	Two learners show their jars and plan. Exit ticket.

Unplugged warm-up

Where did the money go? (5 min): give a pair ₹100 of play money and read a story aloud: “On Monday Aarav bought chips for ₹10, Tuesday a pencil for ₹5, Wednesday chips for ₹10...” Pairs pay into a “shop” pile as you read. At the end, ask how much is left and what the money went on. Point out how the small chips add up.

Teaching the idea

A budget is just a plan for money before you spend it: income in, spending out, the rest saved. Teach “pay yourself first” (savings aside as soon as money arrives) and the three jars: Spend, Save, Share. Pocket money amounts vary a lot between families, so always use the pretend ₹200 and never ask children how much they get. The Share jar matters: giving is part of being good with money, whether it is a Rakhi gift or food for the animal shelter.

Analogy: A budget is like a train timetable for your rupees: every rupee knows which platform (jar) it is going to before it leaves the station.

Live demo: 1) Show three labelled jars (or envelopes) on camera and a ₹200 bundle of play money. 2) Do it the wrong way first: spend on snacks, comic, stickers and ice cream, then show nothing left to save. 3) Reset and “pay yourself first”: ₹60 into Save, ₹30 into Share, then the rest into Spend. 4) Write the plan on screen: Income ₹200 = Spend ₹110 + Save ₹60 + Share ₹30, and check it adds up. 5) Open the weekly pocket money sim and buy the three must-haves; show ₹70 left and ask how much can go on wants if we keep ₹40.

Questions to ask

Ask	Listen for
What is income?	Money that comes in, like pocket money or a gift.
What does “pay yourself first” mean?	Put savings aside as soon as money comes in, before spending.
Name the three jars.	Spend, Save and Share.
Meera gets ₹200 and spends ₹120. How much is left?	₹80.
What should you do if spending is more than income?	Fix the plan: cut a want or spend less.

Differentiation

Support
Use only ₹10 and ₹50 play notes so the jar maths stays simple (₹100 = five ₹10 notes in Spend, four in Save, one in Share).

Stretch
Make a budget for a month (four weeks of ₹200) that saves for a ₹500 goal. How much must go in Save each week?

Common misconceptions

Misconception	How to fix it
Saving is whatever is left at the end.	Usually nothing is left! Save first, as soon as the money comes in.
Small spends do not matter.	₹10 a day is ₹70 a week. Small spends add up.
A budget means you can never buy fun things.	A budget plans fun things too, on purpose.
Sharing means losing money.	Sharing is a choice to help others. It is part of a good money plan.

Assessment

Use the Code Lab results (auto-checked), the quick checks and the Probe answers. Written answers arrive in your review queue.

Exit ticket
You get ₹150. You put ₹50 in Save and ₹20 in Share. How much is in your Spend jar?

Homework
Use your three jars for a week (play money or real pocket money if your family agrees). Fill in the seven-day tracker and bring it next class.

Answer key — Kitabash activities

1. Spend, Save or Share? (perform · categorize)

Spend jar: A snack at school today, A sticker pack, A comic to read this week
Save jar: Money towards a cycle next year, Money for a cricket bat next month, Money kept for an emergency
Share jar: A Rakhi gift for your sister, Food for the animal shelter, Books for your school library drive

2. Budget maths (perform · fill blank)

Answers: 80 · 40 · 40

3. My weekly pocket money (₹200) (perform · budget sim)

Must buy: 🥪 School snacks for the week, 📓 Notebook for school, 🤝 Share jar: class charity box · **Keep at least** ₹40. Snacks, notebook and sharing cost ₹130, leaving ₹70. Keeping ₹40 for the Save jar means wants can cost up to ₹30: the sticker pack, or the ice cream, or the balloon and maybe one more small thing.

4. Make a budget step by step (perform · ordering)

Order: Write your income → List your must-pays, like school snacks → Put savings and sharing aside first → Plan your wants with what is left → Write down what you really spend → Check at the end of the week and fix the plan

5. New situation: Diwali money (probe · multiple choice)

Answer: Spend ₹250, Save ₹200, Share ₹50

6. Project: my weekly pocket-money budget (probe · project)

Answer key — worksheet

1. **Key words:** income = Money that comes in, like pocket money or a gift. · spending = Money that goes out when you buy something. · saving = Money you keep for later. · sharing = Money you give to help others or a good cause.
2. **Spend, Save or Share?:** Spend jar: A snack at school today, A sticker pack, A comic to read this week · Save jar: Money towards a cycle next year, Money for a cricket bat next month, Money kept for an emergency · Share jar: A Rakhi gift for your sister, Food for the animal shelter, Books for your school library drive
3. **Budget maths:** 80 · 40 · 40
4. **My weekly pocket money (₹200):** Must buy: 🥪 School snacks for the week, 📓 Notebook for school, 🤝 Share jar: class charity box. Keep at least ₹40. Snacks, notebook and sharing cost

₹130, leaving ₹70. Keeping ₹40 for the Save jar means wants can cost up to ₹30: the sticker pack, or the ice cream, or the balloon and maybe one more small thing.

5. **Make a budget step by step:** 1 Write your income · 2 List your must-pays, like school snacks · 3 Put savings and sharing aside first · 4 Plan your wants with what is left · 5 Write down what you really spend · 6 Check at the end of the week and fix the plan
