LESSON PLAN · FINANCIAL LITERACY (GR 3–5) BEGINNER: MONEY SMART · LEVEL 1

Lesson 6: Smart Shopping

Module 2 | 45 minutes | Compare and check | Grades 3–6 · ages 8–11

Objective: Compare prices and unit prices, see through offers and ads, and check the bill and change, while doing the family's Diwali shopping on ₹1,000.

Success criteria

- I can compare prices and work out a simple unit price.
- I can tell when an offer is really a saving.
- I can spot tricks in ads.
- I can check a bill and my change.

Key vocabulary

- **compare**: Look at two or more prices before you buy.
- **unit price**: The price of one piece or one kilo.
- **offer**: A special deal, like buy 1 get 1 free or half price.
- **advertisement (ad)**: A message made to make you want to buy something.
- **bill**: The list of what you bought and the total you must pay.

You will need

- Projector or screen share with Kitabash (lesson video, activities)
- Devices: 1 per learner (laptop, tablet or phone); a microphone helps for speaking tasks
- Printed worksheet, paper and pencil
- Project files: l06_smart_shopping_sheet.md, l06_teacher_script.md

Timed lesson plan (45 min)

Time	Stage	What happens
5 min	**Warm-up game**	"Higher or lower?" price game: stand, crouch or sit.
4 min	**Watch + thumbs check**	Play the video. Thumbs: "Is a bigger pack always cheaper?"
5 min	**Live demo**	Biscuit unit price, the pretend ad, and the bill with a planted ₹10 mistake.
6 min	**Build along**	Price detective at home: two sizes, unit price, "do we need it?", one ad trick.
5 min	**Team game**	Quick competition: "Ad trick or useful fact?" sort in two teams; then the unit price detective question.
7 min	**Budget sim**	Diwali shopping with ₹1,000. Poll: which extras did you choose? Who kept more than ₹100?

5 min	**Pairs**	Breakout pairs: offer match and the bill-check race.
4 min	**Probe**	New situation: the free offer (individual).
4 min	**Show-and-tell + exit**	Learners share one price detective find from home. Exit ticket.

Unplugged warm-up

Higher or lower? (5 min): show a picture of an everyday item and a price ("A 1 kg packet of salt: ₹200?"). Learners stand up for "too high", crouch for "too low", stay seated for "about right". Reveal a sensible price each time and ask how they knew. It warms up their price sense.

Teaching the idea

Smart shoppers compare, calculate and check. Unit price (price of one piece or one kilo) shows which pack is really cheaper, but cheaper is only smarter if you need the amount. Offers like "buy 1 get 1 free" and "half price" can help or trick, and ads are designed to make us want things. Finally, always check the bill and count the change: honest mistakes happen at busy counters. Keep all maths with friendly numbers and Indian products: rice, biscuits, diyas, sweets.

Analogy: A smart shopper is like a cricket umpire: they watch carefully, check the replay (the bill), and do not get carried away by the crowd shouting (the ads).

Live demo: 1) Hold up two biscuit packs (or show pictures): 1 for ₹10 and a box of 4 for ₹36. Ask which is cheaper and let the class vote. 2) Work out ₹36 ÷ 4 = ₹9 on screen. 3) Ask: "Is the box always smarter?" (Only if we eat them all.) 4) Show a pretend ad with a cricket star, "Hurry!" and a jingle; ask the class to spot tricks. 5) Show a bill with a deliberate ₹10 mistake (₹75 instead of ₹65). Let the class catch it and model the polite fix. 6) Open the Diwali sim and buy the must-haves.

Questions to ask

Ask	Listen for
What is a unit price?	The price of one piece or one kilo.
4 packs for ₹36: what is the price of one?	₹9.
When is buy 1 get 1 free a good deal?	Only when you really need two.
Name one ad trick.	Famous faces, catchy songs, "hurry, last day!", "everyone has one".
What two things do you check at the counter?	The bill, and your change.

Differentiation

Support
Use unit prices that divide neatly (2 for ₹20, 5 for ₹50) and let learners use play coins to share the price out into piles.

Stretch
Soap: 1 bar for ₹35, or a pack of 4 for ₹120. Which is cheaper per bar, and by how much over four bars? (₹30 each; ₹20 less for four.)

Common misconceptions

Misconception	How to fix it
A bigger pack is always cheaper.	Not always. Work out the unit price.
Free means it costs nothing.	The “free” item is part of what you pay for. It only helps if you need it.
Ads tell us which product is best.	Ads are made to sell. Check the facts: price, weight, date.
Bills are always right.	Mistakes happen. Check the bill and count your change.

Assessment

Use the Code Lab results (auto-checked), the quick checks and the Probe answers. Written answers arrive in your review queue.

Exit ticket
Pens: 2 for ₹20 or 5 for ₹45. Which is cheaper for one pen?

Homework
With a grown-up, compare the price of one item in two sizes at home or at a shop. Fill in the price detective table and decide which is the smart buy for your family.

Answer key — Kitabash activities

1. Unit price detective (perform · multiple choice)

Answer: ₹55

2. Ad trick or useful fact? (perform · categorize)

Ad trick: A cricket star says it makes you a champion, “Hurry, only today!”, “Everyone in your class has one!”, Bright cartoons and a catchy song
Useful fact: Weight: 200 g, Price: ₹45, Best before: March 2027, Made with whole wheat flour

3. Diwali shopping with ₹1,000 (perform · budget sim)

Must buy: 🪔 Clay diyas, pack of 12, 🍬 Box of sweets for the family, 🎨 Rangoli colours, 🎁 Gift for Dadi · **Keep at least** ₹100. The four must-buys cost ₹680, leaving ₹320. Keeping ₹100 means extras can cost up to ₹220: candles and greeting cards (₹150), or extra chocolates and greeting cards (₹210). The lights (₹250) or the toy (₹400) do not fit.

4. What does the offer really mean? (perform · matching)

Buy 1 get 1 free → Two for the price of one, useful only if you need two · Half price → You pay only half of the normal price · ₹10 off → The price is ten rupees less · Free gift inside → The gift is part of what you pay for · Sale ends today! → A push to make you buy fast without thinking

5. Check the bill (perform · fill blank)

Answers: 65 · 10 · 35

6. New situation: the free offer (probe · multiple choice)

Answer: Shop A, because he needs only one and it costs ₹30 less

Answer key — worksheet

1. **Key words:** compare = Look at two or more prices before you buy. · unit price = The price of one piece or one kilo. · offer = A special deal, like buy 1 get 1 free or half price. · advertisement (ad) = A message made to make you want to buy something.
2. **Unit price detective:** A. ₹55 — ₹275 ÷ 5 = ₹55 for each kilo, so the big bag is cheaper per kilo, and it is a smart buy for a family that eats rice every day.
3. **Ad trick or useful fact?:** Ad trick: A cricket star says it makes you a champion, “Hurry, only today!”, “Everyone in your class has one!”, Bright cartoons and a catchy song · Useful fact: Weight: 200 g, Price: ₹45, Best before: March 2027, Made with whole wheat flour

4. **Diwali shopping with ₹1,000:** Must buy: 🪔 Clay diyas, pack of 12, 🍬 Box of sweets for the family, 🎨 Rangoli colours, 🎁 Gift for Dadi. Keep at least ₹100. The four must-buys cost ₹680, leaving ₹320. Keeping ₹100 means extras can cost up to ₹220: candles and greeting cards (₹150), or extra chocolates and greeting cards (₹210). The lights (₹250) or the toy (₹400) do not fit.
5. **What does the offer really mean?:** Buy 1 get 1 free → Two for the price of one, useful only if you need two · Half price → You pay only half of the normal price · ₹10 off → The price is ten rupees less · Free gift inside → The gift is part of what you pay for · Sale ends today! → A push to make you buy fast without thinking
6. **Spot the ad trick:** Any trick (famous face, cartoon, “hurry”, “new”, “everyone has one”) and any fact (price, weight, date, ingredients).
