LESSON PLAN · GENERATIVE AI (GR 6–8) BEGINNER: GEN-AI CREATORS

Lesson 3: AI as a Study Buddy, Not a Cheat

Module 1 | 60 minutes | Learn with AI, check with sources | Grades 6–11 · ages 11–16

Objective: Use AI to explain, quiz you and coach you with questions, catch hallucinations by checking against your textbook, and follow the honest-use rules.

Success criteria

- I can use AI to explain, quiz me and coach me with questions.
- I can catch a hallucination by checking my textbook.
- I can fill in a fact-check table.
- I can explain the difference between study help and cheating.

Key vocabulary

- **hallucination**: A false fact that an AI says confidently.
- **fact-check**: Check a claim against a trusted source.
- **trusted source**: A reliable place to check facts, like your textbook or an official website.
- **Socratic mode**: When the AI asks you questions so you work out the answer.
- **honest use**: Using AI openly in ways your teacher allows, and saying when you used it.

You will need

- Projector or screen share with Kitabash and the AI tools for this lesson
- Devices: 1 per learner (laptop, tablet or phone)
- Learner accounts only where allowed: see the course safety notes
- Printed worksheet (optional)
- Project files: l03-practice-quiz-project-kit.md, l03-teacher-demo-script.md

Timed lesson plan (60 min)

Time	Stage	What happens
5 min	**Warm-up game**	Two truths and a hallucination: learners vote on the false “AI answer” and say how to check it.
6 min	**Watch + thumbs check**	Play the video. Thumbs check: “Asking AI to quiz me is cheating.” (Thumbs down — it is honest study help.)
7 min	**Live demo**	Explain-like-I’m-10, quiz-me and Socratic mode on the shared screen, then fact-check one answer against a real textbook.
5 min	**Quick competition**	Spot the hallucination race, then the Study buddy or cheating sort; fastest all-correct wins.
8 min	**Prompt Lab**	Learners write their quiz-me prompt for their own textbook topic and tick every checklist item.

14 min	**Pairs: quiz and fact-check**	Pairs run the quiz in the AI tool (under 13 via the Kitabash AI helper), answer it, then fill the fact-check table from their textbooks. How to fact-check order game for early finishers.
6 min	**Show-and-tell**	“Hallucination hall of fame”: learners who caught an AI mistake share it and the page that proved it.
5 min	**Probe**	New situation: the wrong date, and Advice for a friend.
4 min	**Exit ticket**	Exit ticket; reminder to check the school’s AI rules with their teacher.

Unplugged warm-up

Two truths and a hallucination (5 min): the teacher reads three “AI answers” about India — two true, one false (e.g. “The national animal of India is the tiger” ✓, “Mount Everest is in Kerala” ×, “The Ganga flows into the Bay of Bengal” ✓). Learners vote on the hallucination and say how they could check it.

Teaching the idea

AI is powerful for learning when it makes the learner think: explain-like-I’m-10 followed by explaining it back, quiz-me (retrieval practice), and Socratic mode (questions instead of answers). It is harmful when it replaces the thinking. Hallucinations are especially common with dates, names, numbers and quotations, so the textbook is the referee. Introduce the fact-check table and the honest-use rules: check your school’s AI policy, never submit AI work as your own, and say how you used AI. Repeat the privacy rule: no names, school or personal details in prompts.

Analogy: AI is like a gym trainer: a good trainer coaches you while you lift — if the trainer lifts the weights for you, you never get stronger.

Live demo: Share screen with the Kitabash AI helper. Ask a learner for a chapter from their textbook. 1) Type “Explain [topic] like I’m 10, in 4 sentences.” Ask a learner to explain it back. 2) Type the quiz-me prompt from the exemplar and answer a question together. 3) Ask for the answer key and check one answer against a real textbook page held to the camera. If there is a mistake, celebrate: “Hallucination caught!” and add it to the fact-check table on screen. If everything is right, show the prepared example (photosynthesis in the mitochondria) and fact-check it. 4) Show Socratic mode with the rectangle-area prompt.

Questions to ask

Ask	Listen for
What is Socratic mode?	The AI asks you questions so you work out the answer.
Why is “quiz me” better for learning than reading answers?	Testing yourself makes you remember.
What kinds of facts does AI often get wrong?	Dates, names, numbers, quotes.

What goes in a fact-check table?	What AI said, what the source says, right or wrong, the fix.
When does AI use become cheating?	When it does the work for you and you hand it in as your own.

Differentiation

Support
Provide a printed fact-check table with the first row filled in. Let learners check just two answers instead of five.

Stretch
Ask the AI the same question in two different ways. Do the answers agree? Fact-check the one that differs.

Common misconceptions

Misconception	How to fix it
If the AI explains it, I have learned it	Explain it back in your own words or get quizzed — that is when you learn.
The AI answer key is always right	Answer keys can contain hallucinations. Check them against your textbook.
Using AI for homework is always cheating	It depends on how. Explaining, quizzing and hints, used honestly, are allowed if your teacher agrees.
A website or video is always a trusted source	Prefer your textbook, official sites and known publishers. Check who made it.

Assessment

Use the Prompt Lab results (auto-checked), the quick checks and the Probe answers. Written answers arrive in your review queue.

Exit ticket
Write one prompt that uses AI as a study buddy, and one rule that keeps it honest.

Homework
Use your corrected AI quiz to revise. Before your next test, ask a family member to quiz you with it.

Answer key — Kitabash activities

1. Prompt Lab: quiz me! (perform · ai lab)

Checklist: Ask it to quiz or test you · Say your grade or class and topic · Choose the question type · One at a time — wait for your answer · Ask for an answer key or explanations to check

Strong example:

```
Quiz me on the chapter “Light and shadows” for Grade 6 Science. Ask me 5 multiple choice questions one at a time and wait for my answer before the next one. After each answer, tell me if I was right and explain why in one sentence. At the end, give me an answer key so I can check it against my textbook.
```

2. Study buddy or cheating? (perform · categorize)

Honest study help: Asking AI to explain a hard chapter in simple words, Asking AI to quiz you before a test, Asking AI for hints, then solving it yourself, Checking your own answer, then telling your teacher you used AI
Cheating: Copying an AI essay and handing it in as yours, Using AI to answer a test while the teacher is not looking, Getting AI to write your homework and not telling anyone

3. Spot the hallucination (perform · multiple choice)

Answer: Photosynthesis happens in the mitochondria.

4. How to fact-check (perform · ordering)

Order: Read the AI answer → Underline the facts, dates and numbers → Look each one up in your textbook or a trusted site → Mark it correct or wrong in your table → Write the fixed answer and tell the AI

5. New situation: the wrong date (probe · multiple choice)

Answer: Wrong — the textbook says 1757 (with page number); fixed answer: 1757

6. Advice for a friend (probe · free response)

Look for: learn, check, honest, quiz. **Example:** If AI does your homework, you will not learn it, and in the exam you will be stuck. AI can also be wrong, so you still have to check it. Be honest — use AI to explain things or quiz you, then do the work yourself and tell your teacher how you used it.

Answer key — worksheet

1. **Key words:** hallucination = A false fact that an AI says confidently. · fact-check = Check a claim against a trusted source. · trusted source = A reliable place to check facts, like your textbook or

an official website. · Socratic mode = When the AI asks you questions so you work out the answer.

2. **Prompt Lab: quiz me!:** Include: Ask it to quiz or test you; Say your grade or class and topic; Choose the question type; One at a time — wait for your answer; Ask for an answer key or explanations to check. Example: Quiz me on the chapter “Light and shadows” for Grade 6 Science. Ask me 5 multiple choice questions one at a time and wait for my answer before the next one. After each answer, tell me if I was right and explain why in one sentence. At the end, give me an answer key so I can check it against my textbook.
3. **Study buddy or cheating?:** Honest study help: Asking AI to explain a hard chapter in simple words, Asking AI to quiz you before a test, Asking AI for hints, then solving it yourself, Checking your own answer, then telling your teacher you used AI · Cheating: Copying an AI essay and handing it in as yours, Using AI to answer a test while the teacher is not looking, Getting AI to write your homework and not telling anyone
4. **Spot the hallucination:** D. Photosynthesis happens in the mitochondria. — Photosynthesis happens in the chloroplasts. The other three are true — check them in your textbook too!
5. **How to fact-check:** 1 Read the AI answer · 2 Underline the facts, dates and numbers · 3 Look each one up in your textbook or a trusted site · 4 Mark it correct or wrong in your table · 5 Write the fixed answer and tell the AI
