LESSON PLAN · GENERATIVE AI (GR 6–8) BEGINNER: GEN-AI CREATORS

Lesson 4: Project: My AI Storybook

Module 1 | 60 minutes | Creative co-writing | Grades 6–11 · ages 11–16

Objective: Co-write a short illustrated story with AI as your helper, design it in Canva, and credit the AI honestly.

Success criteria

- I can plan a story and stay the author while AI helps.
- I can write consistent illustration prompts.
- I can design a storybook in Canva.
- I can credit AI honestly.

Key vocabulary

- **co-write**: Write together, with you in charge.
- **story map**: A plan with the hero, setting, problem and ending.
- **illustration**: A picture that goes with a story.
- **consistent**: Looking the same every time, like a hero on every page.
- **credit**: Saying honestly who or what made each part.

You will need

- Projector or screen share with Kitabash and the AI tools for this lesson
- Devices: 1 per learner (laptop, tablet or phone)
- Learner accounts only where allowed: see the course safety notes
- Printed worksheet (optional)
- Printed project brief
- Project files: l04-storybook-project-kit.md, l04-teacher-demo-script.md

Timed lesson plan (60 min)

Time	Stage	What happens
5 min	**Warm-up game**	Story chain with a sneaky “AI” who changes the hero’s name — learners shout “Caught it!”.
5 min	**Watch + brief**	Play the project video and go through the project brief and rubric. Thumbs check: who is the author?
6 min	**Live demo**	Teacher demo: story map, AI ideas vote, polish-and-check, one illustration, Canva cover and credits.
8 min	**Prompt Lab**	Learners write the story-helper prompt and one illustration prompt; tick every checklist item. Storybook steps order game for early finishers.
18 min	**Build (breakouts)**	Breakout rooms: plan, write four pages, write image prompts (under-13s post prompts in the chat; the teacher generates and shares

		images), design in Canva. Halfway check: everyone has a cover and page 1.
6 min	**Peer review**	Pairs swap storybooks: two stars and a wish, and check the credits page is honest.
7 min	**Show-and-tell**	Storybook gallery: three learners read one page aloud and show a picture; class poll for “best twist” and “best illustration prompt”.
5 min	**Submit + probe**	Submit My AI Storybook with the reflection; New situation: the credits page.

Unplugged warm-up

Story chain (5 min): the teacher says one sentence of a story. Each learner adds one sentence in turn, but the teacher secretly plays “AI” and twice adds a sentence that changes the hero’s name. Learners must shout “Caught it!” when they notice. Talk about why the author must check every change.

Teaching the idea

This module project brings together the prompt formula, checking and honest use. The learner is the author: AI suggests (ideas, polishing one page) but never writes the whole story. The second check moment is “did AI change my details?” — AI often forgets or invents characters. Illustrations: learners write prompts; for under-13s the teacher generates the four images on the shared screen (or in a teacher Canva account) and shares them; 13+ may use Gemini’s image creation or Canva’s AI image app with a parent’s permission, if their account has it. Designing happens in Canva, teacher-led or through a school or family account. Finish with an honest credits page.

Analogy: You are the film director and AI is the crew: the crew can suggest shots and build sets, but the director decides the story and signs the film.

Live demo: Share your screen. 1) Fill in a story map with the class (hero, setting, problem, ending), then send the story-helper prompt to the Kitabash AI helper and let the class vote on one idea. 2) Write two sentences of page 1 together, then ask AI to polish it and read the changes aloud — if it changed any detail, say “Caught it!” and undo it. 3) Generate one illustration in Canva or Gemini (your adult account) from a learner’s prompt, then run the same prompt with a changed hero description to show why consistency matters. 4) Open a Canva storybook or presentation template and build the cover and credits page live.

Questions to ask

Ask	Listen for
Who is the author of your storybook?	Me — AI is only the helper.
How do you keep your hero looking the same in every picture?	Use the same character description in every image prompt.
What should you check after AI polishes a page?	That it did not change or invent details.

What goes on the credits page?	What I did and what AI did.
Why should you not use real photos of classmates?	Privacy — and they did not agree to it.

Differentiation

Support
Provide a story-map template with sentence starters ("One day, ___. But then, ___. So ___. In the end, ___.") and a ready Canva template link.

Stretch
Add a fifth page with a twist ending, or write the story in both Hindi and English.

Common misconceptions

Misconception	How to fix it
If AI writes the story, it is still my project	You must write it. AI may suggest ideas and polish one page.
The AI will keep my hero the same automatically	Repeat the same character description in every image prompt and check each picture.
AI pictures do not need a credit	Always say which parts AI made.
I can use a famous cartoon character	Make your own character — famous characters belong to other people.

Assessment

Project rubric (also on the project brief):

Criterion	1 · Beginning	2 · Developing	3 · Secure	4 · Excellent
Story	No clear problem or ending	Has a beginning and end but the problem is unclear	Clear hero, setting, problem and ending	Engaging, original story with a satisfying twist or message
Prompting	Vague prompts	Prompts with some formula parts	Story and image prompts use role, details, style and limits	Prompts are precise and refined with follow-ups; hero is consistent
Checking & honesty	No credits; AI changes not checked	Credits are vague	Honest credits; AI changes checked	Credits explain exactly what AI did; mistakes caught and fixed are described

Design	Pages missing or hard to read	All pages present; text hard to read in places	Clear, readable pages with matching pictures	Polished, consistent design that makes the story come alive

Exit ticket
Name one thing you did and one thing AI did in your storybook.

Homework
Read your storybook to your family. Ask them to guess which parts AI helped with, then show them your credits page.

Answer key — Kitabash activities

1. Prompt Lab: story helper (perform · ai lab)

Checklist: Give AI a role · Describe your character · Describe the setting · Ask for ideas — you stay the author · Say the length

Strong example:

```
You are a children's story coach. My hero is a boy called Kabir who has a robot kite.
The story is set in a city during Makar Sankranti. Suggest 3 ideas for the problem he
has to solve and 2 ideas for a happy ending. Do not write the story — I will write it
myself in 4 short pages.
```

2. Prompt Lab: illustration prompt (perform · ai lab)

Checklist: What the picture shows · Art style · Colours or light · A hero description you can repeat · No words in the picture

Strong example:

```
A storybook illustration showing a 10-year-old boy with short curly hair, wearing a
yellow kurta and red shoes, flying a small blue robot kite from a rooftop in an Indian
city. Bright watercolour style with warm sunny colours and a clear blue sky. No text or
words in the picture.
```

3. Storybook steps (perform · ordering)

Order: Plan the hero, setting, problem and ending → Write the four pages yourself → Ask AI to polish one page and check every change → Make the four illustrations → Design the pages in Canva → Add the credits page and share

4. Submit My AI Storybook (probe · project)

5. New situation: the credits page (probe · multiple choice)

Answer: "Story by Aarav. Ideas helped by AI. Illustrations made with AI."

Answer key — worksheet

1. **Key words:** co-write = Write together, with you in charge. · story map = A plan with the hero, setting, problem and ending. · illustration = A picture that goes with a story. · consistent = Looking the same every time, like a hero on every page.
2. **Prompt Lab: story helper:** Include: Give AI a role; Describe your character; Describe the setting; Ask for ideas — you stay the author; Say the length. Example: You are a children's story coach. My hero is a boy called Kabir who has a robot kite. The story is set in a city during Makar

Sankranti. Suggest 3 ideas for the problem he has to solve and 2 ideas for a happy ending. Do not write the story — I will write it myself in 4 short pages.

3. **Prompt Lab: illustration prompt:** Include: What the picture shows; Art style; Colours or light; A hero description you can repeat; No words in the picture. Example: A storybook illustration showing a 10-year-old boy with short curly hair, wearing a yellow kurta and red shoes, flying a small blue robot kite from a rooftop in an Indian city. Bright watercolour style with warm sunny colours and a clear blue sky. No text or words in the picture.
4. **Storybook steps:** 1 Plan the hero, setting, problem and ending · 2 Write the four pages yourself · 3 Ask AI to polish one page and check every change · 4 Make the four illustrations · 5 Design the pages in Canva · 6 Add the credits page and share
5. **New situation: the credits page:** B. “Story by Aarav. Ideas helped by AI. Illustrations made with AI.” — An honest credit says clearly who did what. Aarav wrote the story, and AI helped with ideas and pictures.
6. **My plan:** A clear plan that covers every requirement.
7. **Checklist:** All requirements met.
8. **Two stars and a wish:** Kind, specific feedback and an improvement.
