LESSON PLAN · GENERATIVE AI (GR 6–8) BEGINNER: GEN-AI CREATORS

Lesson 8: Capstone: AI for Good Campaign

Module 2 | 60 minutes | Responsible AI for good | Grades 6–11 · ages 11–16

Objective: Pick a real local problem, research it with AI and check facts in two trusted sources, then create and present a poster and a 30-second video script using a responsible-AI checklist.

Success criteria

- I can choose a real local problem and research it with AI.
- I can verify facts in two trusted sources.
- I can create a poster and a 30-second script with a call to action.
- I can use the responsible-AI checklist before sharing.

Key vocabulary

- **campaign**: A planned effort to get people to change something.
- **verify**: Check that a fact is true using trusted sources.
- **trusted source**: A reliable place with known authors that checks its facts.
- **call to action**: The clear thing you ask your audience to do.
- **misinformation**: False information that spreads, even by accident.
- **responsible AI**: Using AI safely, honestly and fairly.

You will need

- Projector or screen share with Kitabash and the AI tools for this lesson
- Devices: 1 per learner (laptop, tablet or phone)
- Learner accounts only where allowed: see the course safety notes
- Printed worksheet (optional)
- Printed project brief
- Project files: l08-ai-for-good-project-kit.md, l08-teacher-demo-script.md

Timed lesson plan (60 min)

Time	Stage	What happens
5 min	**Warm-up game**	Fact or forward? Learners vote Fact / Fake / Need to check on five group-chat claims.
4 min	**Watch + choose**	Play the capstone video. Poll: which problem will you choose — water, plastic, road safety or your own?
6 min	**Live demo**	Research prompt, catch the unverified number, quick Canva poster, time a 30-second script.
6 min	**Prompt Lab**	Learners write their research prompt and script prompt; tick every checklist item. Trusted source sort for early finishers.

20 min	**Build (breakouts)**	Breakouts by problem: research with AI (under 13 via the Kitabash AI helper), verify facts in two sources, make the Canva poster (teacher generates images for under-13s), write and time the script, tick the responsible-AI checklist. Halfway check: sources table done.
12 min	**Campaign showcase**	Show-and-tell: each learner shows their poster and reads their 30-second script (timed). Class gives two stars and a wish in the chat.
4 min	**Awards + vote**	Quick class vote: “Most convincing”, “Best hook”, “Best fact-check”. Celebrate everyone as Gen-AI Creators.
3 min	**Submit + probe**	Submit the campaign with the reflection; New situation: the unverified number.

Unplugged warm-up

Fact or forward? (5 min): the teacher reads five claims like messages from a family group chat (some true, some false or unverifiable). For each, learners vote: “Fact”, “Fake” or “Need to check”. Discuss: which ones would you put on a poster, and how would you check them?

Teaching the idea

The capstone pulls the whole course together: the prompt formula, research with AI, verification in two trusted sources, image prompts with a bias check, honest labelling and presenting. Emphasise that AI is a starting point for research, not the source: every fact and number on the poster must be verified, and very exact or shocking numbers deserve extra suspicion. Learners choose real, local, actionable problems (water saving, plastic, road safety). Tool routes: under 13 research in the Kitabash AI helper and get teacher-made images; 13+ may use ChatGPT, Gemini, Copilot or Perplexity with a parent’s permission (Perplexity shows its sources, but those links still need opening and checking). Canva is teacher-led or via school/family accounts.

Analogy: AI is like a helpful classmate who has read a lot but sometimes misremembers: great for ideas and a first draft, but you check their facts in the library before you put them on the notice board.

Live demo: Share screen. 1) Send the research prompt (water saving) to the Kitabash AI helper. 2) Ask “Give me one shocking statistic about dripping taps.” Then search two trusted sources live (a city water board or government page, a science organisation). If you cannot confirm the number, say “Caught it — it stays off the poster.” If you can, show the source and write it down. 3) Build a quick poster in Canva: one message, three actions, sources, “Made with help from AI”. 4) Send the 30-second script prompt, then read the script aloud with a timer and trim it to fit. 5) Tick the responsible-AI checklist on screen.

Questions to ask

Ask	Listen for
What makes a good campaign problem?	Real, local, and something people can act on.

How many trusted sources should confirm a fact?	Two.
What do you do with a number you cannot verify?	Leave it out.
What are the four parts of the 30-second script?	Hook, problem, actions, call to action.
Name two items on the responsible-AI checklist.	Any two of: facts verified, no personal info, no deepfakes, bias check, AI labelled.

Differentiation

Support
Offer three ready-made problem cards (water, plastic, road safety) with a starter research prompt and two suggested trusted sources for each.

Stretch
Interview a family member about the problem (no names in the campaign), and add one real local observation to your poster, such as “I counted 12 plastic bags on the way to school.”

Common misconceptions

Misconception	How to fix it
If AI says it, it is a fact	AI is a starting point. Verify in two trusted sources.
Shocking numbers make better posters	Unverified numbers spread misinformation. Use only checked facts.
Perplexity shows links, so it is always right	Open the links and check they really say it.
Labelling AI makes my project look worse	Honest labels build trust; people respect transparent creators.

Assessment

Project rubric (also on the project brief):

Criterion	1 · Beginning	2 · Developing	3 · Secure	4 · Excellent
Research & verification	Facts not checked	Some facts checked in one source	Key facts verified in two trusted sources, listed	All facts verified; an AI error or unverifiable claim was found and handled
Message & call to action	Message unclear	Message clear but actions	Clear message with three doable	Memorable, persuasive message tailored to a

		vague	actions and a call to action	local audience
Creation (poster + script)	Poster or script missing	Both present but hard to read or too long	Clear poster and a timed 30-second script	Polished, eye-catching design and a script with a strong hook
Responsible AI	Checklist not used	Some checklist items done	All checklist items done; AI help labelled	Explains how AI was used and the choices made for fairness, privacy and honesty

Exit ticket
What is one thing you will always do before sharing something made with AI?

Homework
Share your campaign with your family (or, with permission, your school). Try one of your own three actions this week and report back.

Answer key — Kitabash activities

1. Prompt Lab: research prompt (perform · ai lab)

Checklist: Give the AI a role · Name a local problem · Ask for simple words · Ask for actions · Ask what to check or where facts come from

Strong example:

```
You are a science teacher. Explain in simple words why plastic litter is a problem near my school in Pune, and suggest 5 easy actions students and families can take. Tell me which facts I should check, and what kinds of trusted sources I could use to verify them.
```

2. Prompt Lab: 30-second script (perform · ai lab)

Checklist: A hook to grab attention · The length · Scenes or shots · A voiceover or narration · A call to action

Strong example:

```
Help me draft a 30-second video script for my campaign about saving water at home. Start with a hook question to grab attention. Split it into 4 scenes, and for each scene describe the shot and write the voiceover. End with a call to action that asks viewers to fix one leaking tap this week. Use simple words for Grade 7.
```

3. Trusted source, or check it elsewhere? (perform · categorize)

Trusted source: Your school science textbook, An official city or government website, A well-known science organisation's website
Check it elsewhere first: A forwarded message on a family chat group, A random video with no name or source, An AI answer with a very exact number

4. Submit your AI for Good campaign (probe · project)

5. New situation: the unverified number (probe · multiple choice)

Answer: Leave it out, or replace it with a fact she has verified in two trusted sources

Answer key — worksheet

1. **Key words:** campaign = A planned effort to get people to change something. · verify = Check that a fact is true using trusted sources. · trusted source = A reliable place with known authors that checks its facts. · call to action = The clear thing you ask your audience to do.
2. **Prompt Lab: research prompt:** Include: Give the AI a role; Name a local problem; Ask for simple words; Ask for actions; Ask what to check or where facts come from. Example: You are a

science teacher. Explain in simple words why plastic litter is a problem near my school in Pune, and suggest 5 easy actions students and families can take. Tell me which facts I should check, and what kinds of trusted sources I could use to verify them.

3. **Prompt Lab: 30-second script:** Include: A hook to grab attention; The length; Scenes or shots; A voiceover or narration; A call to action. Example: Help me draft a 30-second video script for my campaign about saving water at home. Start with a hook question to grab attention. Split it into 4 scenes, and for each scene describe the shot and write the voiceover. End with a call to action that asks viewers to fix one leaking tap this week. Use simple words for Grade 7.
4. **Trusted source, or check it elsewhere?:** Trusted source: Your school science textbook, An official city or government website, A well-known science organisation's website · Check it elsewhere first: A forwarded message on a family chat group, A random video with no name or source, An AI answer with a very exact number
5. **New situation: the unverified number:** B. Leave it out, or replace it with a fact she has verified in two trusted sources — An unverified number can spread misinformation. Only verified facts, with sources, go on a campaign poster.
6. **My plan:** A clear plan that covers every requirement.
7. **Checklist:** All requirements met.
8. **Two stars and a wish:** Kind, specific feedback and an improvement.
