# Lesson 1: AI as a Coding Buddy

Module 1 | 60 minutes | Explain, don't write | Grades 7–11 · ages 12–16

Name: _____ Class: _____ Date: _____

Practise what you learned today. Read each task carefully.

## 1. Key words

Match each word to what it means. Write the letter.

a. program ___ A. A named box that stores a value, like total.
b. line by line ___ B. Code that repeats, such as for r in runs.
c. loop ___ C. Going through code one line at a time.
d. variable ___ D. A list of instructions a computer follows, in order.

## 2. Prompt Lab: explain my code

Write a prompt that asks an AI to explain a short program line by line. Say who you are (generally), ask for simple words, tell it not to rewrite the code, and ask it to quiz you at the end. Put [my code] where the code would go. Write your prompt here, then try it in Kitabash AI helper or ChatGPT or Gemini or Copilot.

## 3. Coding buddy or ghost-writer?

Write each item in the right group: Good buddy use / Ghost-writing (not OK).

a. "Explain what line 4 of my code does." → _____
b. "Write my whole homework program for me." → _____
c. "Quiz me on how this loop works." → _____
d. Copying AI code and saying you wrote it → _____
e. "What does this error message mean?" → _____
f. Pasting the teacher's test question and submitting the answer → _____
g. "Give me a hint, not the answer." → _____

### 4. Check the AI: range(3)

An AI says “range(3) means 1, 2, 3, so this prints Hi three times, numbered 1 to 3.” What does the code really print? Code: for i in range(3): ↵ print("Hi")

a. A. Hi three times (no numbers)
b. B. 1 Hi, 2 Hi, 3 Hi
c. C. Hi four times
d. D. Nothing — range(3) is an error

### 5. The buddy routine

Put an explain-my-code session in the best order. Number them 1–5.

a. ___ Write each line in your own words
b. ___ Compare what the AI said with the real output
c. ___ Ask the AI to explain it line by line
d. ___ Run the code yourself and note the output
e. ___ Ask the AI to quiz you

**How did it go?** Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can ask an AI to explain code line by line without rewriting it.
☐ I can run code to check an AI’s explanation.
☐ I can explain a line of code in my own words.
☐ I can tell good buddy use from ghost-writing.
