PROJECT BRIEF · GENERATIVE AI (GR 6–8) INTERMEDIATE: GEN-AI CREATORS · LEVEL 2

Lesson 4: Project: AI-Assisted Mini Game

Module 1 | 60 minutes | You code, AI coaches | Grades 7–11 · ages 12–16

Name: Class: Date:

Your mission
Plan, code and test your own mini game in Python or Scratch, using AI only to review, explain and debug — with an honest log of exactly what the AI did.

Checklist

- [ ] One-sentence idea and a pseudocode plan reviewed by AI
- [ ] A working game with a score or a win/lose ending
- [ ] At least 3 what-AI-did log entries (asked, said, checked, result)
- [ ] At least 5 player tests recorded
- [ ] Any AI-suggested line is labelled and explained
- [ ] You can explain every line of your code

Milestones

1. Idea, pseudocode and AI plan review — done on: _____
2. Core of the game working — done on: _____
3. Score/ending added and 5 tests run — done on: _____
4. Log complete, explanation practised, submitted — done on: _____

Plan it

Write your plan: the problem, who it is for, the AI tools you will use, and how you will check the AI's work.

How it will be marked

Criterion	1 · Beginning	2 · Developing	3 · Secure	4 · Excellent
Game works	Does not run	Runs but has a major bug or no ending	Runs with a clear goal, score or ending	Polished, fun and handles silly inputs
Planning & testing	No plan or tests	A plan or tests, but incomplete	Pseudocode plan and 5 tests with results	Plan improved after AI review; tests include edge cases and fixes
Honest AI log	No log	Log is vague (“AI helped”)	3+ entries with asked, said, checked, result	Detailed entries, including AI mistakes caught and how
Understanding	Cannot explain the code	Can explain some lines	Can explain every line	Explains every line and why it was written that way

Want more?

- Add a play-again loop and a high score
- Add difficulty levels (easy 1–10, hard 1–100)
- Make a Python and a Scratch version and compare them

Two stars and a wish

Ask a friend to test your project.
