LESSON PLAN · GENERATIVE AI (GR 6–8) INTERMEDIATE: GEN-AI CREATORS · LEVEL 2

Lesson 6: AI Audio and Video

Module 2 | 60 minutes | Script · Storyboard · Consent | Grades 7–11 · ages 12–16

Objective: Plan a 30-second explainer video with a checked script, a storyboard, your own voice and properly licensed music, following the consent and no-deepfake rules.

Success criteria

- I can write and edit a 30-second script and check its facts.
- I can storyboard a short video with timings.
- I can follow consent and no-deepfake rules.
- I can choose music I am allowed to use and credit it.

Key vocabulary

- **explainer video**: A short video that teaches one idea clearly.
- **script**: The exact words that will be spoken.
- **storyboard**: Boxes showing each shot, its words and timing.
- **voiceover**: Recorded speech played over the pictures.
- **deepfake**: A fake video or voice made to look like a real person.
- **licence**: The rules for how you may use music or pictures.

You will need

- Projector or screen share with Kitabash and the AI tools for this lesson
- Devices: 1 per learner (laptop, tablet or phone)
- Learner accounts only where allowed: see the course safety notes
- Printed worksheet (optional)
- Project files: l06-explainer-video-kit.md, l06-teacher-demo-script.md

Timed lesson plan (60 min)

Time	Stage	What happens
5 min	**Warm-up game**	Thirty-second challenge: pairs explain a topic in exactly 30 seconds and count the words.
5 min	**Watch**	Play the lesson video; pause on the made-up number and ask “What would you do with it?”
3 min	**Thumbs check**	Thumbs up / down: “A fake video of a celebrity is fine if it is funny.” (Down.) Discuss why in one sentence each.
8 min	**Live demo**	Teacher demo: AI script draft, time it, fact-hunt, storyboard on the whiteboard, then the Canva video and audio library.
6 min	**Prompt Lab (pairs)**	Pairs write the 30-second script prompt and improve it until every item is ticked.

5 min	**Quick competition**	OK or not OK sort race and the video words match; first three all-correct win.
14 min	**Breakout: script + storyboard**	In breakout rooms, learners edit their AI draft, time it, and draw a 4–5 shot storyboard with timings and credits. Storyboard order game for early finishers.
7 min	**Show-and-tell**	Volunteers read their script aloud to a 30-second timer while showing the storyboard. Class poll: did it fit in 30 seconds?
7 min	**Probe + exit ticket**	New situation: the cricket captain promo, then the exit ticket.

Unplugged warm-up

Thirty-second challenge (5 min): pairs get a topic card (“how to make chai”, “why we wear helmets”). One partner explains it out loud in exactly 30 seconds while the other times it. Most go too long! Count the words in a 30-second explanation — that is why scripts must be short.

Teaching the idea

This lesson moves from text and images (Level 1) to audio and video. Learners plan a 30-second explainer: about 70–80 spoken words, a hook, one message and an ending. AI may draft or suggest hooks, but learners cut, rewrite and fact-check — any unverifiable number is removed. They storyboard 4–5 shots with timings that add to 30 seconds, plan their own voiceover and choose licensed music (Canva’s audio library, used under its licence). The non-negotiables: consent before filming or recording anyone, no deepfakes or voice copies of real people (even as a joke or for a good cause), and credits for music and AI help. Under 13, the teacher builds the video on the shared screen; 13+ may use Canva through a school or family account.

Analogy: A storyboard is like a cricket team’s field plan: everyone knows where they stand before the first ball, so the match (the edit) goes smoothly.

Live demo: Shared screen: Kitabash AI helper + Canva. 1) Type the script prompt from the video (75 words, hook, ending, no uncheckable numbers). 2) Read the draft aloud with a 30-second timer — is it too long? 3) Hunt for facts: if it invents a number, say “Caught it — no source, it goes.” If it has none, ask the class “Is every sentence true?” and cut any vague claim. 4) Draw a 4-box storyboard on a whiteboard with times. 5) In Canva, create a video design, add one page per shot, show the audio library and point out that tracks have licence terms. 6) Add a credits page: “Script edited from an AI draft. Music: [track name], Canva audio library.” Do NOT demonstrate any voice-cloning or face-swap tools.

Questions to ask

Ask	Listen for
About how many words fit in a 30-second script?	About 70–80.
What should you do with a fact in an AI script that you cannot check?	Remove it, or check it in a trusted source first.

What is a deepfake, and is it OK as a joke?	A fake video or voice of a real person — never OK, even as a joke.
Where can you get music you are allowed to use?	Canva's audio library or free-to-use tracks, following the licence.
What goes on the last storyboard box?	The ending, the call to action and the credits.

Differentiation

Support
Give a storyboard template with the four boxes labelled Hook / Problem / Actions / Ending and a script frame with blanks. Learners can choose from three ready topics.

Stretch
Make a Hindi–English bilingual version of the script with captions, or plan two hooks and test which one the class prefers in a quick poll.

Common misconceptions

Misconception	How to fix it
If AI wrote it, the facts must be right	AI can invent numbers. Check every fact or remove it.
A deepfake is fine if it is funny or for a good cause	Faking a real person is never OK — it can hurt them and mislead others.
Any song online is free to use	Most music is owned. Use licensed libraries and follow the rules.
A longer script is a better script	Thirty seconds is about 75 words. Short and clear wins.

Assessment

Use the Prompt Lab results (auto-checked), the quick checks and the Probe answers. Written answers arrive in your review queue.

Exit ticket
Name one thing you will never put in your video, and why.

Homework
Finish your storyboard. Record yourself reading the script on a family phone (only your own voice) and time it. Bring your timing and one change you made.

Answer key — Kitabash activities

1. Prompt Lab: 30-second script (perform · ai lab)

Checklist: Set the length · Say the audience · Ask for a hook · Ask for an ending or call to action · Ban invented facts · No real people

Strong example:

```
Write a 30-second explainer script, about 75 words, for Grade 8 students on why we
should recycle plastic. Start with a strong hook and end with a call to action. Do not
invent numbers or facts I cannot check, and do not mention any real people or
celebrities.
```

2. OK or not OK in your video? (perform · categorize)

OK: Your own voice reading your script, Music from Canva's audio library, used under its licence, A friend on camera who agreed, with a parent's OK, A credits page saying the script was edited from an AI draft
Not OK: An AI voice copying a famous cricketer, A Bollywood song downloaded from a video site, A fake video of your teacher saying "no homework"

3. Storyboard order (perform · ordering)

Order: Hook: a tap that runs dry → The problem: water gets scarce in summer → Three actions: fix leaks, tap off, reuse water → Ending and credits: save water today

4. Match each video word to its meaning (perform · matching)

storyboard → Boxes showing each shot, its words and timing · voiceover → Recorded speech played over the pictures · deepfake → A fake video or voice made to look like a real person · licence → The rules for how you may use music or pictures · consent → A clear yes from a person before you film or record them

5. New situation: the cricket captain promo (probe · multiple choice)

Answer: Not make it — use his own voice and a cricket picture he is allowed to use

Answer key — worksheet

1. **Key words:** explainer video = A short video that teaches one idea clearly. · script = The exact words that will be spoken. · storyboard = Boxes showing each shot, its words and timing. · voiceover = Recorded speech played over the pictures.
2. **Prompt Lab: 30-second script:** Include: Set the length; Say the audience; Ask for a hook; Ask for an ending or call to action; Ban invented facts; No real people. Example: Write a 30-second explainer script, about 75 words, for Grade 8 students on why we should recycle plastic. Start

with a strong hook and end with a call to action. Do not invent numbers or facts I cannot check, and do not mention any real people or celebrities.

3. **OK or not OK in your video?:** OK: Your own voice reading your script, Music from Canva's audio library, used under its licence, A friend on camera who agreed, with a parent's OK, A credits page saying the script was edited from an AI draft · Not OK: An AI voice copying a famous cricketer, A Bollywood song downloaded from a video site, A fake video of your teacher saying "no homework"
4. **Storyboard order:** 1 Hook: a tap that runs dry · 2 The problem: water gets scarce in summer · 3 Three actions: fix leaks, tap off, reuse water · 4 Ending and credits: save water today
5. **Match each video word to its meaning:** storyboard → Boxes showing each shot, its words and timing · voiceover → Recorded speech played over the pictures · deepfake → A fake video or voice made to look like a real person · licence → The rules for how you may use music or pictures · consent → A clear yes from a person before you film or record them
