PROJECT BRIEF · GENERATIVE AI (GR 6–8) INTERMEDIATE: GEN-AI CREATORS · LEVEL 2

Lesson 8: Capstone: AI for Our School

Module 2 | 60 minutes | Problem → prototype → pitch | Grades 7–11 · ages 12–16

Name: _____ Class: _____ Date: _____

Your mission
Design, prototype, test and pitch an AI-powered helper that solves a real problem at your school — with an ethics check and an honest what-AI-did log.

Checklist

- [ ] A real school problem and a named user group
- [ ] An AI spec: inputs, outputs, rules and the human's role
- [ ] A working prototype (app instructions, program, chart or video plan)
- [ ] At least 6 tests recorded, including tricky and attack cases, with fixes
- [ ] An ethics check covering privacy, fairness, honesty and over-trust
- [ ] A 3-minute pitch with a live demo and an honest AI credit

Milestones

1. Problem, user and AI spec — done on: _____
2. Prototype working — done on: _____
3. Tests run, fixes made, ethics check done — done on: _____
4. Pitch practised and delivered — done on: _____

Plan it

Write your plan: the problem, who it is for, the AI tools you will use, and how you will check the AI's work.

How it will be marked

Criterion	1 · Beginning	2 · Developing	3 · Secure	4 · Excellent
Problem & user	Problem unclear or not real	Problem stated, user vague	Real problem and clear user, checked with people	Sharp, well-evidenced problem with a clear user need
AI design & prototype	No working prototype	Prototype partly works; spec incomplete	Working prototype with a clear spec and human role	Thoughtful design: AI used only where it helps, strong rules, polished prototype
Testing & ethics	No tests or ethics check	A few normal tests; ethics check vague	6+ tests with fixes; ethics check covers all four areas	Attack and edge cases tested and fixed; ethics risks addressed in the design
Pitch & honesty	No pitch or no AI credit	Pitch over time or missing a demo	Clear 3-minute pitch with demo and honest AI credit	Compelling pitch, smooth demo, confident answers about limits

Want more?

- Run your prototype with five real users (anonymous feedback) and make a chart of the results
- Make a 30-second explainer video for your helper
- Write version 2 of your spec based on user feedback

Two stars and a wish

Ask a friend to test your project.
