Lesson 8: Capstone: AI for Our School

Module 2 | 60 minutes | Problem → prototype → pitch | Grades 7–11 · ages 12–16

Name: _____ Class: _____ Date: _____

Plan your project and practise the key ideas.

1. Key words

Match each word to what it means. Write the letter.

a. capstone ___ A. Checking a design for privacy, fairness, honesty and over-trust.
b. prototype ___ B. The person the solution is designed for.
c. user ___ C. A small, working first version of an idea.
d. ethics check ___ D. A final project that uses everything from the course.

2. Prompt Lab: critical-friend ethics check

Write a prompt asking an AI to act as a critical friend for your capstone idea. Describe the problem and user, ask for ethical risks under privacy, fairness, honesty and over-trust, ask for one fix for each, and tell it not to rewrite your idea. Write your prompt here, then try it in Kitabash AI helper or ChatGPT or Gemini or Copilot.

3. Ethics check: pass or needs a fix?

Write each item in the right group: Passes / Needs a fix.

a. The helper says “Ask at the school office” when unsure → _____
b. It asks students for their full name and class → _____
c. It only works for students who read English well → _____
d. It has a note: “AI can be wrong — check with a teacher” → _____
e. It invents where a lost bottle is → _____
f. Test log shows attack tests were run and fixed → _____

4. Pitch order

Put the 3-minute pitch in order. Number them 1–6.

a. ___ What you tested, fixed and checked for ethics
b. ___ A live demo with a normal and a tricky test
c. ___ What your AI helper does
d. ___ Who the user is
e. ___ The problem, with a story or checked number
f. ___ Next step and an honest AI credit

5. New situation: the judge's question

During Arjun's pitch, a judge asks: "What happens if your lost-and-found helper is wrong?" What is the best answer? Circle one.

a. A. "It is never wrong — it uses AI."
b. B. "It only suggests places to check, says when it does not know, and always tells students to ask at the office. We tested it with tricky cases."
c. C. "We will fix it later."
d. D. "That is the user's problem."

6. My plan

Plan your project: Design, prototype, test and pitch an AI-powered helper that solves a real problem at your school — with an ethics check and an honest what-AI-did log. Sketch it and list what each part will do.

7. Checklist

Tick each one when your project does it.

a. ☐ A real school problem and a named user group
b. ☐ An AI spec: inputs, outputs, rules and the human's role
c. ☐ A working prototype (app instructions, program, chart or video plan)
d. ☐ At least 6 tests recorded, including tricky and attack cases, with fixes
e. ☐ An ethics check covering privacy, fairness, honesty and over-trust
f. ☐ A 3-minute pitch with a live demo and an honest AI credit

8. Two stars and a wish

Ask a friend to test your project. Write two things they liked and one idea to improve it.

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can define a real problem and user.
☐ I can design and prototype an AI helper with rules and a human role.
☐ I can test my prototype and run an ethics check.
☐ I can pitch my solution in 3 minutes with a live demo.
