WORKSHEET · PYTHON (GR 6–8) BEGINNER: PYTHON GAME CODERS

Lesson 3: Numbers and Decisions

Module 1 | 60 minutes | int, maths, if/elif/else | Grades 6–10 · ages 11–15

Name: _____ Class: _____ Date: _____

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. int() ___ A. Run different code depending on conditions.
b. operator ___ B. A test that is True or False, like age < 12.
c. condition ___ C. A maths symbol such as +, -, *, / or //.
d. if / elif / else ___ D. Turns text like "42" into the number 42.

2. Plan your program

Before you type it: Cinema ticket counter. Ask the age with int(input(...)). Under 12 gets a Child ticket for Rs 100, under 60 gets an Adult ticket for Rs 250, and everyone else gets a Senior ticket for Rs 150. Print the ticket type and price. Write the steps in plain English (pseudocode), then the Python you will use.

3. Predict the output: half century?

What does this program print? Code: runs = 48 ↵ if runs >= 50: ↵ print("Half century!") ↵ else: ↵ print("Keep going!") ↵ print("Next ball...")

a. A. Keep going! then Next ball...
b. B. Half century! then Next ball...
c. C. Only Keep going!
d. D. Half century! then Keep going!

4. Match each symbol to what it means

Draw a line from each word to its match.

a. * ..... A. Is more than or equal to?
b. // ..... B. Is not equal to?
c. % ..... C. Is equal to?
d. == ..... D. The remainder after dividing
e. != ..... E. Divide into a whole number
f. >= ..... F. Multiply

5. Plan your program

Before you type it: Debug it! This pocket-money checker should print `Party time!` for 150 and `Save up!` for 40. It has three bugs: one about numbers, one about a colon and one about spaces. Fix them all. Write the steps in plain English (pseudocode), then the Python you will use.

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can turn input into a number with int().
☐ I can do maths with + - * / // and %.
☐ I can use if, elif and else to make a decision.
☐ I can test my program with edge numbers.
