PROJECT BRIEF · PYTHON (GR 6–8) BEGINNER: PYTHON GAME CODERS

Lesson 4: Project: Quiz Show

Module 1 | 60 minutes | score variables and decisions | Grades 6–10 · ages 11–15

Name: _____ Class: _____ Date: _____

Your mission
Build a five-question quiz game on a topic you love. It keeps score, gives feedback after every answer and awards a final grade.

Checklist

- [ ] 5 questions on one topic
- [ ] A score variable that starts at 0 and goes up with +=
- [ ] Feedback after every answer
- [ ] Answers accepted in any capitals with .lower()
- [ ] Final score out of 5 and a grade with if / elif / else
- [ ] A title screen and a “Made by” comment

Milestones

1. Questions and answers written on paper — done on: _____
2. Question 1 works and is tested with right and wrong answers — done on: _____
3. All 5 questions work and the score adds up — done on: _____
4. Final grade works for scores 0, 3 and 5; a friend has played it — done on: _____

Plan it

Write the steps of your program in plain English (pseudocode) before you code.

How it will be marked

Criterion	1 · Beginning	2 · Developing	3 · Secure	4 · Excellent

Program works	Crashes or fewer than 3 questions run	3–4 questions run; score sometimes wrong	All 5 questions run and the score is always right	Works perfectly and handles odd answers like extra spaces
Decisions and score	No if/else or no score	if/else on some questions	if/else on every question and a correct final grade	Grade order is correct and explained; adds a bonus or percentage
Player experience	No feedback to the player	Says right or wrong only	Kind feedback that shows the right answer	Fun title screen, clear questions and a celebration at the end
Code quality and testing	Hard to read; never tested	Some comments; tested once	Comments for each question; tested with right and wrong answers	Neat, well named, and tested by another player with changes made

Want more?

- Add a bonus question worth 2 points
- Show the score as a percentage with score * 100 // 5
- Give the player a second chance on one question before showing the answer

Two stars and a wish

Ask a friend to test your project.
