Lesson 7: Lists: Many Things in One Box

Module 2 | 60 minutes | lists, index, append, in | Grades 6–10 · ages 11–15

Name: _____ Class: _____ Date: _____

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. list ___ A. Adds an item to the end of a list.
b. item ___ B. The position number of an item. The first is 0.
c. index ___ C. One value inside a list.
d. append ___ D. Many values stored in order inside [ ].

2. Plan your program

Before you type it: Snack list. Start with snacks = ["samosa", "jalebi", "pakora"]. Ask the user for one more snack and append it. Then use a for loop to print every snack, and finally print `We have 4 snacks!` using len(). Write the steps in plain English (pseudocode), then the Python you will use.

3. Predict the output: index and length

What does this program print? Code: team = ["Aarav", "Meera", "Kabir"] ↵ team.append("Zoya") ↵ print(team[1], len(team))

a. A. Meera 4
b. B. Aarav 4
c. C. Meera 3
d. D. Aarav 3

4. List facts

A list is written with _____ brackets. The first item is at index _____. To add an item to the end, use _____. To check if something is in a list, use the word _____. (Word bank: square, round, 0, 1, append, remove, in, if)

5. Plan your program

Before you type it: Debug it! This colour list should print `First: red`, then `Last: blue`, then add yellow and print `4 colours`. It has three bugs. Fix them. Write the steps in plain English (pseudocode), then the Python you will use.

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

- ☐ I can make a list and read items by their index.
- ☐ I can add items with append and count them with len.
- ☐ I can loop through a list with for.
- ☐ I can check if something is in a list with in.
