Lesson 1: Hello, web!

Module 1 | 60 minutes | tags, headings, paragraphs | Grades 6–11 · ages 11–16

Name: _____ Class: _____ Date: _____

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. HTML ___ A. The tag with a slash that ends a part, like .
b. browser ___ B. A word in angle brackets that tells the browser what something is.
c. tag ___ C. The app that reads HTML and draws the page, like Chrome or Edge.
d. closing tag ___ D. The language web pages are written in.

2. Plan your page

Before you code it: Turn this one-line page into a real page. Keep the h1 heading, add an h2 section heading, and add at least two paragraphs about what your page is for. Sketch the page and list the tags you will use.

3. Predict the page

What will the browser show? Code: <h1>Cricket Corner</h1> ↵ India won ↵ the match!

a. A. A big heading, then one line: “India won the match!”
b. B. A big heading, then the paragraph on two lines with all the spaces
c. C. Everything as one big heading
d. D. The tags themselves, like <h1> and

4. Match each piece of HTML to its job

Draw a line from each word to its match.

a. <h1> ..... A. A comment the browser does not show
b. <h2> ..... B. A closing tag: the paragraph ends here
c. ..... C. A paragraph of normal text
d. ..... D. A section heading, a bit smaller
e. <!-- note --> ..... E. The biggest heading: the page title

5. Order it: from file to screen

Put the steps in order: how does a web page reach your screen? Number them 1–4.

a. ___ The browser reads the tags from top to bottom
b. ___ The browser gets the HTML text file
c. ___ You open a web address or an HTML file
d. ___ The browser draws headings and paragraphs on the screen

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can explain how a browser reads an HTML file.
☐ I can write headings with h1 and h2.
☐ I can write paragraphs and close every tag.
☐ I can choose safe things to share on a page.
