Lesson 3: CSS colours, fonts and boxes

Module 1 | 60 minutes | CSS rules, box model | Grades 6–11 · ages 11–16

Name: _____ Class: _____ Date: _____

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. CSS ___ A. What you change it to, like orange.
b. selector ___ B. What you want to change, like color.
c. property ___ C. The part of a rule that picks what to style, like h1.
d. value ___ D. The language that styles a web page: colours, fonts, spacing.

2. Plan your page

Before you code it: This page is plain black and white. Add a style tag that changes the text colour, the background colour and the font. Sketch the page and list the tags you will use.

3. Predict the colours

Which text turns blue? Code: <style> ↵ p { color: blue; } ↵ </style> ↵ <h1>Holi Party</h1> ↵ Bring your colours!

a. A. Only “Bring your colours!”
b. B. Only “Holi Party”
c. C. Both lines
d. D. Neither line, because the rule is inside a style tag

4. Match each CSS property to what it changes

Draw a line from each word to its match.

a. color ..... A. Space outside the box
b. background-color ..... B. The line around the box
c. font-family ..... C. Space inside the box, around the words
d. padding ..... D. The typeface, like Arial
e. border ..... E. The colour behind the text
f. margin ..... F. The colour of the text

5. Order it: build a CSS rule

Build this CSS rule in the right order: h1 { color: orange; } Number them 1–7.

a. ___ ; (a semicolon)
b. ___ orange (the value)
c. ___ : (a colon)
d. ___ color (the property)
e. ___ { (open the curly bracket)
f. ___ h1 (the selector)
g. ___ } (close the curly bracket)

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can write a CSS rule with a selector and property.
☐ I can change text and background colours.
☐ I can change the font and its size.
☐ I can use padding, border and margin on a box.
