LESSON PLAN · WEB DEVELOPMENT (GR 6–8) BEGINNER: WEB CREATORS · LEVEL 1

Lesson 4: Project: fan page or club page

Module 1 | 60 minutes | plan, build, check, share | Grades 6–11 · ages 11–16

Objective: Plan, build and check a three-section fan page or school club page that uses headings, lists, a picture, a link and CSS.

Success criteria

- I can plan a page with a wireframe.
- I can build a page with three sections.
- I can style a whole page with one style tag.
- I can check a page is safe and ready to share.

Key vocabulary

- **wireframe**: A quick sketch of a page's layout made before coding.
- **section**: A tag that groups a heading with its content.
- **consistent**: Using the same colours and fonts everywhere.
- **credit**: A line saying who made a picture.
- **feedback**: Kind, specific comments that help improve work.

You will need

- Projector with Kitabash (lesson video, Web Lab)
- Devices: 1 per learner, with a keyboard
- Printed worksheet (optional)
- Printed project brief
- Project files: l04-three-section-skeleton.html, l04-teacher-demo.md

Timed lesson plan (60 min)

Time	Stage	What happens
5 min	**Warm-up game: Wireframe Race**	Everyone sketches a fan or club page in 3 minutes; share sketches to camera and praise clear labels.
5 min	**Hook, video and brief**	Show the FAN PAGE hook and play the project video. Read the rubric together; thumbs poll on which topic each learner picks.
5 min	**Demo and skeleton**	Run the demo, then learners do "three-section skeleton" and Predict the boxes. Quick quiz on the designer's workflow order.
25 min	**Build in breakout rooms**	Learners build their fan or club page. Halfway check-in (minute 12): everyone has three sections in the preview. Teacher visits each room.
8 min	**Peer test: two stars and a wish**	Pairs swap screens and test with the ready-to-share checklist, then type two stars and a wish in the chat. Everyone fixes one thing.
5 min	**Probe and submit**	Ready to share, or fix it first? sort. Write the reflection and submit.

7 min	**Show-and-tell and wrap-up**	Three learners present their page in one minute each. Exit ticket: two things to check before sharing.

Unplugged warm-up

Wireframe Race (5 min game): in 3 minutes, everyone sketches a fan page on paper with a title and three labelled boxes. Hold sketches up to the camera. The teacher picks three to praise for clear labels, then learners swap one idea with a partner.

Teaching the idea

Today learners pull together everything from Module 1 into one page. They plan with a wireframe, build the HTML in three sections, style the page once with a style tag, and run a ready-to-share checklist. The section tag groups a heading with its content, and one CSS rule can style all sections. Coach them to finish a working version first, then improve.

Analogy: Building a web page is like making a school magazine: sketch the layout, write the articles, choose the colours, then proofread before printing.

Live demo: 1) Show a hand-drawn sketch (wireframe) of a page with a title and three boxes labelled About, What we do, Join us. 2) Type the three <section> blocks with an h2 each and point out how sections group a heading with its content. 3) Add one CSS rule for section with padding, border and margin, and show all three boxes change at once. 4) Fill one section with a list and one with a picture, alt text and a credit line. 5) Run the “ready to share” checklist out loud: alt text on every picture, credits, a link that works, no personal details. 6) Press Check and celebrate each goal that turns green.

Questions to ask

Ask	Listen for
Why sketch first?	You know what to build, so coding is faster and the page has a clear shape.
What does the section tag do?	It groups a heading with the content that belongs to it.
How can one rule style three boxes?	The selector section picks every section on the page.
What must every picture have?	Alt text and a credit line.
What should never be on the page?	Full names, school, address, phone number or private photos.

Differentiation

Support
Give learners the skeleton starter and a list of ideas for each section. Accept a page with two complete sections and a third started, then help them finish after class.

Stretch
Add a nav bar at the top with three links, rounded corners with border-radius, and a footer. Try hover colours with a:hover.

Common misconceptions

Misconception	How to fix it
Styling first, content later	Build the content first, then style it, or you spend the lesson choosing colours.
More colours make a better page	Two or three colours used consistently look more professional.
If it passes Check, it is perfect	Check finds the basics. A real person testing it finds what is confusing.
A phone number is fine for “Join us”	Never share contact details. Say “ask your teacher” instead.

Assessment

Project rubric (also on the project brief):

Criterion	1 · Beginning	2 · Developing	3 · Secure	4 · Excellent
Structure (HTML)	Fewer than two sections; tags left open	Two or three sections; some headings missing	Three sections with h2 headings, a list, a picture and a link	Clear, well-organised sections with extra elements used well
Style (CSS)	No CSS or hard to read	Some colours, but not consistent	Consistent colours and font, framed sections, easy to read	A polished design with a clear colour scheme and good spacing
Content	Very little text	Some text, mostly short	Interesting text in every section about the topic	Engaging, accurate writing that makes visitors want to read more
Safe and responsible	Personal details shared or pictures uncredited	Some alt text or credits missing	All pictures have alt text and credits; no personal details	Helpful alt text, credits and links that all work; explains their choices

Exit ticket
Name two things you must check before you share a web page.

Homework
Show your fan or club page to someone at home. Ask them for two stars and a wish, and make one improvement before next class.

Answer key — Kitabash activities

1. Web Lab: three-section skeleton (perform · web lab)

Goals checked: Has three sections · Each section has a heading · Has words in the sections

One solution:

```
<h1>Our Club Page</h1>

<section>
  <h2>About us</h2>
  <p>We are the Green Thumbs gardening club.</p>
</section>

<section>
  <h2>What we do</h2>
  <p>We grow tulsi, tomatoes and marigolds in the school garden.</p>
</section>

<section>
  <h2>Join us</h2>
  <p>Ask your class teacher how to join.</p>
</section>
```

2. Predict the boxes (perform · code output)

3. Order it: the designer's workflow (perform · ordering)

Order: Sketch a wireframe on paper → Build the HTML sections → Add colours and fonts with CSS → Check alt text, credits, links and privacy → Ask a friend to test it and improve one thing

4. Project: my fan or club page (perform · web lab)

Goals checked: Has a page title · Has three section headings · Has a list · Has a picture with alt text · Has a link · Is styled with CSS · Has plenty to read

Example page:

```
<!-- Fan page: Kitabash Astronomy Club -->
<style>
  body {
    background-color: #0b1a33;
    color: #f0f4ff;
    font-family: Verdana, sans-serif;
    margin: 20px;
  }
  h1 {
    color: gold;
    text-align: center;
  }
  h2 {
    color: #8ecae6;
  }
  section {
    background-color: #13284d;
    border: 2px solid #8ecae6;
    padding: 16px;
    margin: 16px 0;
  }
  a {
    color: gold;
  }
</style>

<h1>Stargazers Astronomy Club</h1>
<p>We look up! A club for anyone who loves planets, stars and space missions.</p>

<section>
  <h2>About us</h2>
  <p>We meet after school every Friday to learn about the night sky. No telescope
needed, just curiosity.</p>
  <img src="https://placehold.co/300x180?text=Night+Sky" alt="Placeholder picture of a
dark blue night sky">
  <p>Picture credit: placeholder image from placehold.co</p>
</section>

<section>
  <h2>What we do</h2>
  <ul>
    <li>Spot planets and constellations</li>
    <li>Build paper model rockets</li>
    <li>Follow space missions like Chandrayaan</li>
  </ul>
</section>

<section>
  <h2>Our top 3 space facts</h2>
  <ol>
    <li>A day on Venus is longer than its year.</li>
```

```
    <li>The Sun is a star.</li>
    <li>India landed near the Moon’s south pole in 2023.</li>
  </ol>
  <p>Learn more about <a href="https://en.wikipedia.org/wiki/Chandrayaan-3">Chandrayaan-
3</a>.</p>
</section>

<p>Made by the Stargazers Club. Ask your teacher to join.</p>
```

5. Ready to share, or fix it first? (probe · categorize)

Ready to share: A picture with alt text and a credit line, A link that opens the right page, “Made by the Stargazers Club”, Dark text on a light background
Fix it first: A picture with no alt text, “Call me on 98xxxxxxxx to join”, Yellow text on a white background, A photo copied from a website with no credit

Answer key — worksheet

1. **Key words:** wireframe = A quick sketch of a page’s layout made before coding. · section = A tag that groups a heading with its content. · consistent = Using the same colours and fonts everywhere. · credit = A line saying who made a picture.
2. **Plan your page:** Goals: Has three sections; Each section has a heading; Has words in the sections.
3. **Predict the boxes:** A. Three: every section gets a border
4. **Order it: the designer’s workflow:** 1 Sketch a wireframe on paper · 2 Build the HTML sections · 3 Add colours and fonts with CSS · 4 Check alt text, credits, links and privacy · 5 Ask a friend to test it and improve one thing
5. **Ready to share, or fix it first?:** Ready to share: A picture with alt text and a credit line, A link that opens the right page, “Made by the Stargazers Club”, Dark text on a light background · Fix it first: A picture with no alt text, “Call me on 98xxxxxxxx to join”, Yellow text on a white background, A photo copied from a website with no credit
6. **My plan:** A clear plan that covers every requirement.
7. **Checklist:** All requirements met.
8. **Two stars and a wish:** Kind, specific feedback and an improvement.
