Lesson 7: First JavaScript

Module 2 | 60 minutes | script, events, variables | Grades 6–11 · ages 11–16

Name: Class: Date:

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. JavaScript ___ A. Something that happens, like a click.
b. script tag ___ B. A unique name for one element, used to find it.
c. id ___ C. The tag that holds JavaScript code.
d. event ___ D. The language that makes web pages react and move.

2. Plan your page

Before you code it: Make the button talk! The page has a button and a message. In the script, find the button by its id, listen for a click, and change the message's textContent when it is clicked. Sketch the page and list the tags you will use.

3. Predict the score

What will the score show? Code: let runs = 0; ⏎ runs = runs + 4; ⏎ runs = runs + 6; ⏎ runs = runs + 1; ⏎ score.textContent = "Runs: " + runs;

a. A. Runs: 11
b. B. Runs: 0
c. C. Runs: 1
d. D. Runs: 461

4. Match each piece of JavaScript to its job

Draw a line from each word to its match.

a. <script> ..... A. Adds one to the score
b. let score = 0; ..... B. The words inside an element
c. document.getElementById("btn") ..... C. Waits for a click, then runs code
d. addEventListener("click", ...) ..... D. Finds the element with id="btn"
e. textContent ..... E. Makes a variable that starts at zero
f. score = score + 1; ..... F. Holds the JavaScript code

5. Order it: build a counter

Put these steps in order to make a working click counter Number them 1–6.

a. ___ Listen for a click and add 1 to clicks
b. ___ Find the button and paragraph with getElementById
c. ___ Make a variable: let clicks = 0
d. ___ Add a script tag at the bottom of the page
e. ___ Add a button and a paragraph, each with an id
f. ___ Show the new number with textContent

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can add JavaScript in a script tag.
☐ I can find an element with getElementById.
☐ I can make a button react with addEventListener.
☐ I can keep score with a variable.
