LESSON PLAN · WEB DEVELOPMENT (GR 6–8) BEGINNER: WEB CREATORS · LEVEL 1

Lesson 8: Capstone: my one-page website

Module 2 | 60 minutes | plan, build, test, launch | Grades 6–11 · ages 11–16

Objective: Plan and build a one-page website for a local cause or mini business idea with navigation, a gallery, a form and an interactive button.

Success criteria

- I can plan a website for a real audience.
- I can link a nav bar to sections with ids.
- I can combine a gallery, a form and a button.
- I can test and check a site before launch.

Key vocabulary

- **header**: The banner area at the top of a page.
- **nav**: A group of links for moving around the site.
- **jump link**: A link like href="#gallery" that moves to a section on the same page.
- **footer**: The area at the bottom, often with credits.
- **launch**: Making a finished page ready for others to see.
- **audience**: The people a website is made for.

You will need

- Projector with Kitabash (lesson video, Web Lab)
- Devices: 1 per learner, with a keyboard
- Printed worksheet (optional)
- Printed project brief
- Project files: l08-header-nav-jump-links.html, l08-teacher-demo.md

Timed lesson plan (60 min)

Time	Stage	What happens
5 min	**Warm-up game: Elevator Pitch**	Thirty-second pitches of each learner's cause or idea; thumbs-up votes and best taglines on the board.
5 min	**Hook, video and brief**	Show the LAUNCH hook and play the video. Read the rubric together; poll: cause or business?
5 min	**Demo and jump links**	Run the demo with the model site, then learners do "jump links", Predict the jump and the match game.
25 min	**Build in breakout rooms**	Learners build their website section by section. Halfway check-in (minute 12): header, nav and gallery are in the preview. Teacher visits every room.

8 min	**Click test and peer feedback**	Pairs swap screens, click every link and button in each other's preview, then give two stars and a wish. Optional: save the page as .html and test it in a real browser too.
5 min	**Probe and submit**	Launch day check sort. Fix one thing, write the reflection and submit.
7 min	**Launch party and wrap-up**	Show-and-tell "launch party": three learners present in one minute each; class claps in emoji. Exit ticket: the #contact jump link.

Unplugged warm-up

Elevator Pitch (5 min game): each learner has 30 seconds to pitch their cause or business idea: name, who it is for, and what visitors should do. Classmates hold up a thumbs-up if they would visit the page. The teacher writes the best taglines on the whiteboard.

Teaching the idea

The capstone brings the whole course together: a header and nav bar of jump links (href="#id" matching a section id), sections, a flexbox gallery of cards with alt text and credits, a practice form with labels, and one JavaScript button. Learners choose a real local cause or mini business idea, plan who it is for, build section by section, test every link and button in the preview, and run a launch checklist that covers honesty and privacy as well as working code.

Analogy: A one-page website is like a stall at a school fair: a banner (header), signs pointing to each table (nav), the tables themselves (sections), a sign-up sheet (form) and something fun to try (the button).

Live demo: 1) Show the finished Green Lane Book Swap model page in the Web Lab preview and scroll through it: header, gallery, form, button. 2) Show the nav links with href="#gallery" and the matching section id="gallery"; click a link and watch the page jump. 3) Show how the gallery reuses the lesson 5 flexbox cards and the form reuses lesson 6. 4) Click the "I swapped a book!" button and show the counter from lesson 7. 5) Open the capstone starter in the Web Lab and show the pieces learners will fill in. 6) Read the launch checklist aloud: alt text and credits, labels joined, button clicked and tested in the preview, no personal details, kind and honest words.

Questions to ask

Ask	Listen for
How does a jump link know where to go?	The word after the hash matches a section's id.
Which lesson did the gallery come from?	Lesson 5: flexbox cards.
How do you test the button?	Click it in the live preview and check the page changes as expected.
What must your form never ask?	Personal details like phone numbers, addresses or passwords.

Why does honesty matter on a website?	Visitors trust what they read; false claims can mislead or harm people.

Differentiation

Support
Give the capstone starter and the lesson 5–7 build-along files to copy from. A minimum viable page is header, two sections, gallery and button; the form can follow.

Stretch
Add a dark-mode button that changes the body colours, a hover effect on cards, and a “back to top” jump link in the footer.

Common misconceptions

Misconception	How to fix it
href="gallery" works the same as href="#gallery"	Without the hash the browser looks for another page. Use #gallery for the same page.
A website for a cause can exaggerate to get attention	Keep every claim honest. Exaggeration misleads visitors.
Photos of friends are fine to post	Always ask first, and avoid photos that show faces, uniforms or places.
A link to #gallery works even if the section id is spelt “Gallery”	Ids must match exactly, including capitals. Click every nav link to test it.

Assessment

Project rubric (also on the project brief):

Criterion	1 · Beginning	2 · Developing	3 · Secure	4 · Excellent
Structure and navigation	Few sections; links missing	Sections present but some jump links broken	Header, nav and three sections with working jump links	Clear, well-organised page; navigation is smooth and complete
Design (CSS and layout)	Little or no styling	Some styling; gallery not laid out with flexbox	Consistent colours and fonts; flexbox gallery of cards	Polished, readable design with thoughtful spacing and colour
Form and interaction	No form or button	Form or button present but not working or unlabelled	Labelled form and a working, tested button	Accessible, private form and a creative interactive feature

Purpose, honesty and safety	Unclear purpose or personal details shared	Purpose clear but some credits or alt text missing	Clear purpose, honest claims, alt text and credits, no personal details	Persuasive and honest page that clearly serves its audience; explains choices

Exit ticket
Write a jump link that goes to a section with id="contact".

Homework
Present your website to your family as if it were launch day. Ask them to try every link and the button, then write down one improvement for Level 2.

Answer key — Kitabash activities

1. Web Lab: jump links (perform · web lab)

Goals checked: Has a nav bar · Has at least three links · Links jump to the sections

One solution:

```
<style>
  nav a { margin-right: 12px; }
  section { padding: 12px; border-bottom: 1px solid #cccccc; }
</style>

<h1>Clean Park Drive</h1>
<nav>
  <a href="#about">About</a>
  <a href="#gallery">Gallery</a>
  <a href="#join">Join</a>
</nav>

<section id="about"><h2>About</h2><p>Who we are.</p></section>
<section id="gallery"><h2>Gallery</h2><p>Our pictures.</p></section>
<section id="join"><h2>Join</h2><p>How to help.</p></section>
```

2. Predict the jump (perform · code output)

3. Match each page part to its job (perform · matching)

<header> → The banner at the top with the title · <nav> → A group of links to move around · <section id="gallery"> → A part of the page that links can jump to · href="#gallery" → A link to a place on the same page · <footer> → The credit line at the bottom

4. Capstone: my one-page website (perform · web lab)

Goals checked: Has a header and nav bar · Has at least three section headings · Has a flexbox gallery · Has pictures with alt text · Has a form with labels · Has a working button script · Has plenty to read

Example page:

```
<!-- Capstone: Green Lane Book Swap -->
<style>
  body {
    margin: 0;
    font-family: Verdana, sans-serif;
    background-color: #fbfaf5;
    color: #2d3436;
  }
  header {
    background-color: #2e7d32;
    color: white;
    padding: 24px;
    text-align: center;
  }
  nav a {
    color: white;
    margin: 0 10px;
  }
  section {
    padding: 20px;
    margin: 0 auto;
    max-width: 720px;
  }
  h2 {
    color: #2e7d32;
  }
  .gallery {
    display: flex;
    flex-wrap: wrap;
    gap: 14px;
  }
  .card {
    width: 200px;
    background-color: white;
    border: 2px solid #a5d6a7;
    border-radius: 12px;
    padding: 12px;
  }
  label {
    display: block;
    margin-top: 10px;
  }
  input, select, textarea {
    padding: 8px;
  }
  button {
    margin-top: 12px;
    padding: 10px 18px;
    background-color: #2e7d32;
    color: white;
    border: none;
```

```
    border-radius: 8px;
  }
  footer {
    text-align: center;
    padding: 16px;
    font-size: 14px;
  }
</style>

<header>
  <h1>📚 Green Lane Book Swap</h1>
  <p>Bring a book. Take a book. Share the joy of reading!</p>
  <nav>
    <a href="#about">About</a>
    <a href="#gallery">Gallery</a>
    <a href="#join">Join</a>
  </nav>
</header>

<section id="about">
  <h2>About the swap</h2>
  <p>Many of us have books we have already read sitting on a shelf. Our colony book swap
gives them a second life. Every month, neighbours bring old books and swap them for new
ones, for free.</p>
  <p id="books">Books swapped so far: 120</p>
  <button id="cheer">I swapped a book! 📖</button>
</section>

<section id="gallery">
  <h2>Gallery</h2>
  <div class="gallery">
    <div class="card">
      <img src="https://placehold.co/240x150?text=Story+Books" alt="Placeholder picture
labelled Story Books">
      <h3>Story books</h3>
      <p>Mysteries, adventures and funny tales.</p>
    </div>
    <div class="card">
      <img src="https://placehold.co/240x150?text=Comics" alt="Placeholder picture
labelled Comics">
      <h3>Comics</h3>
      <p>Superheroes, mythology and more.</p>
    </div>
    <div class="card">
      <img src="https://placehold.co/240x150?text=Science" alt="Placeholder picture
labelled Science">
      <h3>Science</h3>
      <p>Space, animals and how things work.</p>
    </div>
  </div>
  <p>Pictures: placeholder images from placehold.co</p>
</section>

<section id="join">
  <h2>Tell us what you like to read</h2>
  <p>This is a practice form. Nothing is sent anywhere.</p>
  <form>
    <label for="genre">Favourite kind of book</label>
    <select id="genre">
```

```
      <option>Adventure</option>
      <option>Mystery</option>
      <option>Comics</option>
    </select>
    <label for="count">How many books could you bring?</label>
    <input type="number" id="count" min="0">
    <label for="idea">An idea for the swap</label>
    <textarea id="idea"></textarea>
    <button type="button">Send</button>
  </form>
</section>

<footer>Made by the Green Lane Readers Club · 2026</footer>

<script>
  let books = 120;
  const booksText = document.getElementById("books");
  document.getElementById("cheer").addEventListener("click", function () {
    books = books + 1;
    booksText.textContent = "Books swapped so far: " + books + " 🎉";
  });
</script>
```

5. Launch day check: ready, or fix it first? (probe · categorize)

Ready to launch: Nav links jump to the right sections, Every picture has alt text and a credit, The button works when you click it, “Made by the Green Lane Readers Club”
Fix it first: “Our plants cure every illness!”, A form that asks for your home address, A link to #gallery but the section id is “photos”, A photo of a classmate posted without asking

Answer key — worksheet

1. **Key words:** header = The banner area at the top of a page. · nav = A group of links for moving around the site. · jump link = A link like href="#gallery" that moves to a section on the same page. · footer = The area at the bottom, often with credits.
2. **Plan your page:** Goals: Has a nav bar; Has at least three links; Links jump to the sections.
3. **Predict the jump:** A. The page jumps down to the “Join the clean-up” section
4. **Match each page part to its job:** <header> → The banner at the top with the title · <nav> → A group of links to move around · <section id="gallery"> → A part of the page that links can jump to · href="#gallery" → A link to a place on the same page · <footer> → The credit line at the bottom
5. **Launch day check: ready, or fix it first?:** Ready to launch: Nav links jump to the right sections, Every picture has alt text and a credit, The button works when you click it, “Made by the Green Lane Readers Club” · Fix it first: “Our plants cure every illness!”, A form that asks for your home address, A link to #gallery but the section id is “photos”, A photo of a classmate posted without asking
6. **My plan:** A clear plan that covers every requirement.
7. **Checklist:** All requirements met.
8. **Two stars and a wish:** Kind, specific feedback and an improvement.

Kitabash original curriculum.
